Ceiling Hoists, Poolside Hoists

Changing Room Solutions

Ceiling Pool Hoists Poolside Hoists Changing Equipment

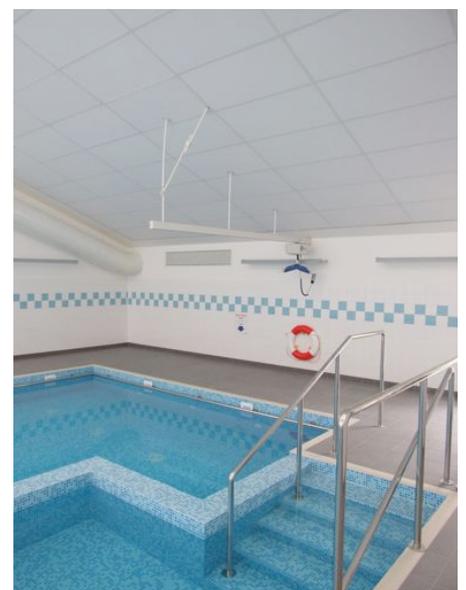

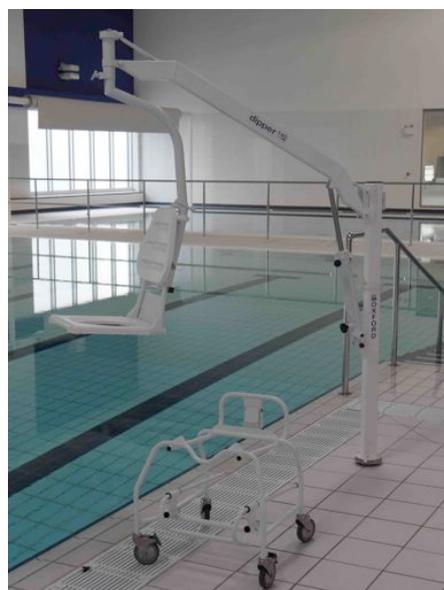

OpeMed can design the solution in the pool using our OT200 ceiling hoist or our poolside chair, sling or stretcher hoist.

All systems can be removed when not in use, are discreet and simple to use.

The changing area can be connected to the pool using our OT200 ceiling track or the modular chair system can be wheeled through.

OpeMed shower trolleys, changing tables and shower chairs are often used in the changing room for washing, drying and changing, either in combination with a ceiling hoist or independently.

All equipment is specially coated for swimming pool use.

Bathing

Pool Access

OpeMed's poolside hoists are available as sling, seat or stretcher attachments. The chair option connects to the hoist and then when released can be wheeled into the changing room for showering, reducing the number of transfers.

The OpeMed flotation slings are ideal for support and for lowering in and out of the pool.

Changing Room

OpeMed has electric and hydraulic, fixed or height adjustable changing tables that can be used for changing and showering. They fold away when not in use and have a warm soft cover.

If connection to the poolside is required our shower chairs, shower trolley or poolhoist chair can be wheeled through to the pool. Alternatively the OT200 hoist can connect through from the pool to the changing room.

Design

OpeMed pride themselves on their involvement at design stage, suggesting the best solutions on budget, on-time and with minimum disruption.

Our Poolhoists can be fitted to newbuild or existing pools and we have a wealth of knowledge of indoor or outdoor pools in domestic, school or public buildings.
