

Solutions for Transfer and Care

## Case Study

Changing Places Facility  
Bradgate Country Park, Leicester

### Opemed Install Changing Places at Top-Class Leicestershire Country Park

With around 830 acres of stunning countryside, Bradgate Country Park takes accessibility very seriously. As the official co-sponsor of Changing Places, Opemed/ Aveso have worked with the team at Bradgate to increase their accessibility and offering to disabled visitors by offering a brand new Changing Places facility featuring a Changing Bench, Hoist and Height Adjustable Sink.

Bradgate Park has been named as one of the UK's Top 10 Parks in the prestigious Trip Advisor Travellers' Choice Awards. The impressive nature and history combined and with the new addition of a thoughtfully designed Changing Places toilet, it is clear why they are so popular.

#### The Changing Places Facility

Changing Places include a Changing Table, Hoist and room for 2 carers. Standard wheelchair accessible toilets aren't suitable for many disabled people or their carers as they do not provide the level of assistance from equipment that is needed. This includes people with profound and multiple learning disabilities as well as other serious impairments such as spinal injuries and muscular dystrophy for example.

#### The Equipment

The Wall Mounted Changing Table is fully height adjustable folding away neatly against the wall when not in use and is simple and easy to operate at the touch of a button.

The weight capacity is 200kg and the stretcher is made from a special high tension tear resistant material, is comfortable and easy to clean as well as maintain. This low maintenance wall-mounted unit is ideal for a multi-user environment such as Bradgate.

The OpeMax 500 Floor Hoist is a compact yet versatile passive lifter. The unique self-balancing cradle is ideal for sitting the user up and lying down with minimal handling.

The curved design ensures that the user can rotate 360° without making contact with the hoist unit. There is a choice of 3 spreader bars which can be changed depending upon the user, making the OpeMax 500 a flexible solution.

The high quality unique Corian material is used for durability on the washbasin and is the material of choice for architects and designers specialising in healthcare as users may need to apply full body weight during washing.

The Washbasin has handset controlled taps and pop up waste and LED strip light, making it the perfect basin for wheelchair users with limited movement who may need extra assistance.
