

### Berkshire Multi-Care Home Installs 69 Ceiling Hoists

The Home, located in beautiful Berkshire grounds has been providing high quality care since 1948. To meet growing demands for care, Lynwood has recently undergone a number of extensions to their services to include Nursing, Dementia and Sheltered Accommodation.

OpeMed delivered design expertise for ceiling hoists and ceiling tracking for 69 of the new Nursing Home and Dementia rooms including bedrooms, wet-rooms, assisted bathrooms and the rehabilitation and leisure swimming pools.

#### Ensuring Practical Ceiling Hoist Solutions

By offering our clients our expertise in room design, we can ensure that not only all of the structural considerations have been addressed but also the attention to aesthetic details and user-friendly features such as handy charging points and storage areas.

The OT200 Compact Ceiling Hoist is a second-generation model that is 30% smaller than the previous version. With all of the same proven unique features such as Gravity Charging, 200kg Safe Working Load, Emergency No-Tools Lowering and 6 point spreader bars but in a more compact and attractive design.

BEN selected OpeMed Ceiling Hoists for multiple rooms:

- 69 rooms have XY to XY full room covering systems
- 15 are fitted with portable ceiling hoists for occasional use
- A specialist bariatric room has been equipped for bariatric patients up to 400kg and supplied with specialist reinforcements to meet the needs of these users

All equipment installed into BEN Lynwood has been rigorously load tested to comply with ISO-10535 and LOLER.

## The OT200 Ceiling Hoist; The Ideal Nursing Home Hoist

As an assistive piece of equipment, the OT200 is designed with both the user and carer in mind.

- The OT200 is the smallest hoist in its class, giving optimum aesthetics
- OpeMed's Gravity Charging System ensures the hoist is always ready to use, conserves energy and reduces the maintenance cost by reducing the number of replacement batteries required over the life-time of the hoist
- The spreader bar has 6 hooks for optimum comfort and sling usage. Manual and Powered Cradles are available to suit clip sling users
- The unique dual emergency lowering function is fully automatic, never requiring the carer to manually wind down the hoist therefore reducing the risk of carer injury
